## Secure societies: CIP-01-2017 specific challenge

Disruptions in the operation of our **countries' infrastructure may put at risk** the functioning of our societies and their economies. A comprehensive, yet installation-specific approach is needed to secure the integrity of existing or future, public or private, connected and interdependent installations. Since the global financial crisis has imposed unprecedented budgetary restrictions on both the public and private sectors, **new security solutions must be more efficient and cost-effective than the ones currently available.**

## Secure societies: CIP-01-2017 scope

Proposals should **focus on one of the following critical infrastructures**: Water Systems, Energy Infrastructure (power plants and distribution), Transport Infrastructure and means of transportation, Communication Infrastructure, **Health Services**, Financial Services. Proposals should cover: prevention, detection, response, and in case of failure, mitigation of consequences .

A list of topics that remain eligible in 2017: published in section "Topic Conditions & Documents" for topic on Participant portal.  
The participation of SMEs is strongly encouraged.

## Secure societies: WP 2018-2020
